

531

Multi-Metal Safe Acid Based Scale Remover

Product Description

531 is a powdered, multi-metal safe, acid based scale remover and cleaner formulated for use in mass finishing systems.

Performance Features

- Removes Rust, Oxides, Mill Scale And Heat Scale
- Provides Faster Descaling Than Alkaline Scale Removers
- Appropriate For Use On Most Metals
- Can Be Used In Open Or Vented Closed Systems

Physical Specifications

Physical State	Granular Solid
Appearance	Light Brown
pH (Use Dilution)	≈ 2
Rinseability	Excellent

Equipment Requirements

531 is safe for use in all standard mass finishing systems. Operation of equipment should be done in accordance with the equipment manufacturer's instructions.

Product Make-Up

531 is a concentrated scale remover. Dilute to specified strength concentrations. When mixing always add acid to water! Never add water to acid!

Concentration and Application Methods

Add .5 - 8 oz. of 531 per gallon of water depending on degree of scale or rust on parts, type of media, and parts being cleaned. Closed barrel type machines should be vented to avoid a pressure buildup during the cycle. Rinse well with water. Follow with an alkaline neutralizing rinse, ideally with a corrosion inhibitor.

Companion Products

See Seacole's 500 Mass and Metal Finishing Series.

Technical Data Sheet

Safety and Handling

Read and understand this products MSDS before handling.

Waste Treatment

Individual users should verify the nature of spent solutions to assure compliance with local, state, and federal regulations. Contact Seacole for specific details and/or further waste treatment recommendations.

Ordering Information

531 is available in 50 pound pails and 400 pound drums.
