

Liquid Ice Melt Calcium Based Liquid Ice Melt

Product Description

Liquid Ice Melt is a fast, effective calcium chloride based ice melt conveniently packaged in liquid form for easy application.

Performance Features

- Quickly Removes Ice From Sidewalks, Driveways, and Other Surfaces at Temperatures as low as 25°F Below Zero
- Can Be Pre-Applied to Surfaces to Prevent Ice from Forming
- Particularly Valuable Where Pellet Deicers Can Not Stay in Place Due to Degree of Slopes, Open Grated Surfaces, Winds, or Heavy Traffic
- Easy To Use - Simply Spray or Pour on Areas To Be Cleared
- Leaves NO White Residue
- Saves Time And Labor Costs For Ice Removal
- Does Not Harm Concrete Or Landscaping When Used As Directed

Physical Specifications

Physical State	Liquid
Appearance	Clear to Hazy
Effective Temperature Range	Down to -25°F

Product Make-Up

Liquid Ice Melt is packaged ready-to-use. Do not dilute.

Concentration and Application Methods

Apply Liquid Ice Melt at full strength to areas where ice is a problem. Spray application is the best method. Thick ice may require repeat application for complete removal. Allow 30 to 60 minutes between applications for most efficient thawing. Can be pre-applied to surfaces to prevent ice from forming.

Companion Products

See Seacole's Railroad and Heavy Equipment product line.

Ordering Information

Liquid Ice Melt is available in 5 gallon pails and 55 gallon drums.
